Credit history maintained by one must be applied equally to the other without modification and without additional qualifications not required of the other.

2.3.5.3 Establishment and Reestablishment of Credit

An applicant who had previously been a customer of the Company and whose service had been discontinued for nonpayment of bills shall be required, before service is rendered, to pay all amounts due the Company, or execute a deferred payment agreement, if offered, to reestablish credit.

A transfer of service from one premises to another within the service area of the Company shall not be deemed a disconnection within the meaning of these rules, and no additional deposit may be demanded unless in accordance with these rules.
- b. When the customer has paid bills for service for twelve (12) consecutive residential billings or for twenty-four (24) consecutive business billings without having service disconnected for nonpayment and without having more than two occasions on which a bill was delinquent, and when the customer is not delinquent in the payment of current bills, the Company may refund the deposit, including interest, to the customer in the form of cash or credit to a customer ' s bill or void the guarantee. 2.3.5.6 Deposit Not to Affect Regular Collection Practices

The fact that a deposit has been made shall in no way relieve the applicant or subscriber from complying with the Company ' s regulations as to advance payments and the prompt payment of bills on presentation, nor constitute a waiver or modification of the regular practices of the Company providing for the discontinuance of service for nonpayment of any sum due the Company for services rendered. The Company may discontinue service to any subscriber failing to pay current bills without regard to the fact that such subscriber has made a deposit with the Company (to secure the payment of such bills).

The Company may discontinue service not less than ten (10) days after written notice has been sent to the customer.
- b. A one-time penalty not to exceed 4.0% may be made on delinquent commercial or industrial bills; however, no such penalty shall apply to residential bills under this section. Residential customers are assessed a late payment charge as set forth in Section 2.3.10.

The late payment charge shall be the portion of the payment not received two business days prior to the next billing cycle, multiplied by 1.5%.

Late payment fees do not apply to the disputed portion of unpaid balances, if resolved in favor of the Customer. Any disputed portion of unpaid balances, if resolved in favor of the Company, may be subject to the late payment fee as of the original due date noted on the Customer's bill. When a Customer's service has been disconnected in accordance with this tariff and the service has been terminated through the completion of a Company service order, service will be re-established only upon the basis of an application for new service.

Service initiated after the discontinuance for non-payment will be subject to the standard non-recurring charges for new service as defined in Sections 3 and 4 of this tariff. Service that has been re-established may require the assignment of a new telephone number.

If any Company service has been suspended, restricted, or discontinued for nonpayment, service will be re-established upon receipt of all charges due, which includes charges for services and facilities during the period of restriction or suspension and which may include a service restoration fee. If the Customer has a history of payments returned for insufficient funds, the Company may require payment by cash, money order or certified check. If such payments are made by personal check, restoration of service will be effected upon bank clearance of the check.

If service is established and it is subsequently determined that the Customer is indebted to the Company for service previously furnished, the Company may restrict, suspend or terminate such service until satisfactory arrangements have been made for the payment of the prior indebtedness. The Company reserves the right, at its discretion, to change the terms and conditions specified in this tariff, including, but not limited to, the rates for services. Any changes to the terms and conditions will be applicable to services provided after the effective date of the change.

At the expiration of the initial term specified in each service order, or in any extension thereof, service shall continue on a month to month basis at the then current rates. 3.3 CUSTOM FEATURES

The features in this section are made available on an individual basis or as a part of feature packages. Custom features are offered on a monthly basis where facilities or interconnection arrangements are available.

- a. **Anonymous Call Rejection - ACR - (*77)** - Allows customers to automatically reject all calls that have been marked anonymous, unavailable, or private by the calling party. When ACR is active, the called party receives no alerting (ringing) for a call that has been rejected. The call is routed to a denial announcement and subsequently terminated.
- b. **Auto Redial - Repeat Dialing - (*66)** - This feature automatically redials the last outgoing number dialed by the Customer. Activation and deactivation of this feature is completed by the Customer. Repeat Dialing will attempt to call the number for a maximum of thirty (30) minutes after the feature is activated. Once the call is established, the Customer will hear a special ring when the call can be completed. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions.

Repeat Dialing (usage sensitive) is available on a pay-per-use basis, and the functionality is the same as Repeat Dialing. Repeat Dialing (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

- c. **Selective Call Rejection** - Selective Call Rejection enables the Customer to block calls from up to fifteen (15) pre-selected telephone numbers. To block specified telephone numbers, the Customer builds a screening list via code activation. Customers may access their screening list to add telephone numbers by dialing *60. Customers may deactivate Selective Call Rejection by dialing *80. To block an unknown telephone number after receiving the call, the Customer enters a blocking code to add the number to the Customer's screening list. In the event that facilities are unavailable to provide incoming call screening from the Customer's list, standard call completion will occur. Customers whose telephone numbers are blocked are directed to a prerecorded announcement regarding the block.

3.3 CUSTOM FEATURES - (Continued)

- d. **Call Forwarding** - Permits a customer to transfer all incoming calls to another dialable telephone number. The customer pre-selects a second telephone number to which all incoming calls are to be transferred automatically. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the access line originating the call and the access line to which the call is transferred. Customers utilizing Call Forwarding service are responsible for the payment of charges for each toll call between the customer's access line and the distant access line to which the call was transferred.
- e. **Call Forwarding - (Busy Line)** - automatically reroutes an incoming call to a customer predesignated number when the called number is busy.
- f. **Call Forwarding - (No Answer)** - automatically reroutes an incoming call to a customer predesignated number when the called number does not answer within the number of rings programmed by the Company.
- g. **Call Forwarding - (Busy Line /No Answer)** - provides for the automatic routing of incoming calls to a preselected telephone number when the called telephone number is busy and/or does not answer within a determined number of rings. When Call Forwarding service is provisioned in a central office, the pre-selected forwarded telephone number must be within the same central office control group. No assurance can be given that transmission will be fully satisfactory during Call Forwarding service calls.
- h. **Call Forwarding - (Remote Access To)** - Remote Access to Call Forwarding provides the Customer that is a subscriber of a Call Forwarding service with the ability to activate, deactivate or change Call Forwarding designations from a remote location. This service can only be accessed from a Dual Tone Multi-Frequency (DTMF) equipped telephone which has a full set of characters including "*" and "#". All charges incurred to access the remote number will be billed appropriately. The transmission may not meet normal standards depending upon the distance and routing necessary.

3.3 CUSTOM FEATURES - (Continued)

- i. **Call Forwarding - (Selective)** - Selective Call Forwarding provides the Customer with the ability to forward incoming calls from pre-selected telephone numbers to another telephone number. The Customer can construct or modify a telephone number screening list. Incoming calls will be screened against the Customer's list and only those telephone calls from telephone numbers on the list will be forwarded. The Selective Call Forwarding Customer is responsible for the payment of charges (i.e., toll charges) for each call between the Selective Call Forwarding equipped telephone line and the line to which the call is being forwarded. Calls from numbers not on the list will receive standard call completion. The Customer must also subscribe to the Call Forwarding feature.

Subscribers to Selective Call Forwarding activate the service and construct or modify the screening list by dialing *63 and following the prompts. This service may be temporarily deactivated by dialing *83.

- j. **Call Return - (*69)** - This feature allows the Customer to automatically return the most recent incoming call, even if it is not answered. If the telephone number is busy, Call Return will attempt to call the number for a maximum of thirty (30) minutes after the feature is activated. Once the call is established, the Customer will hear a special ring when the call can be completed. This is accomplished by the Customer activating a code. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions. The operability of this call back feature is dependent upon whether the caller's originating telephone number can be recognized, or not.

Call Return (usage sensitive) is available on a pay per use basis and the functionality is the same as Call Return. Call Return (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

SECTION 3 - CONSUMER LOCAL SERVICE DESCRIPTIONS - (Continued)

3.3 CUSTOM FEATURES - (Continued)

- k. **Call Trace - (Customer Originated)** - Allows a customer to request an automatic trace of the last incoming call. This provides an easy way to trace obscene, threatening or harassing calls. A Call Trace may be activated at any time during or immediately following the call to be traced. The incoming call detail recorded by the Company showing the results of the trace (i.e., telephone number traced) will not be released to the customer. Such call detail shall be provided only to law enforcement authorities upon request. A trace cannot be successfully completed if the incoming call originates in a telephone central office not equipped for Call Trace Service.

At its option or upon receipt of a proper request from a law enforcement agency, the Company will set up a temporary tracing arrangement using Call Tracing at no charge to the customer when in the judgment of the Company or law enforcement agency, the unwanted call(s) present a serious threat of harm or destruction of property.

- l. **Call Waiting** - This feature provides a tone signal that alerts the Customer talking on the line when a second call is incoming. A maximum of two calls may be in process at one time. A Customer who subscribes to Call Waiting can also inhibit the reception of the Call Waiting tone for the duration of a single call, preventing interruption of the call by activating the code (*70) to cancel Call Waiting. This functionality is automatically included with the Call Waiting feature at no additional cost to the Customer.
- m. **Call Waiting ID (With Name and Number)** - Call Waiting ID with Name and Number is an enhanced version of Call Waiting ID. It is designed for use by a Call Waiting subscriber. A customer who is off-hook on an existing call, is able to receive the telephone number of a new incoming call on their customer-provided premise equipment attached to the Customer's subscriber line. Additionally, the name found in the Company's records, applicable to the line originating the call, including the non-published and non-listed service is displayed on customer-provided premise equipment. The Customer must purchase the equipment separately, and it is not available under this tariff.

- o. **Three-Way Calling** - Enables a customer to add a third party on an existing call without operator assistance, thereby establishing a three-way conversation. The transmission quality may vary depending on the distance and routing necessary and may not necessarily meet normal standards.

Three-Way Calling (usage sensitive) is available on a pay per use basis and the functionality is the same as Three-Way Calling. Three-Way Calling (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

SECTION 3 - CONSUMER LOCAL SERVICE DESCRIPTIONS - (Continued)

3.3 CUSTOM FEATURES - (Continued)

- s. **Priority Call (*61)** - This feature permits the Customer to preselect telephone numbers that can be given a distinctive alerting signal or ring. The Customer can create or change a list of telephone numbers by dialing an activation code. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions.
- t. **Distinctive Ring** - Distinctive Ring allows a Customer to establish up to two telephone numbers on the same access line and to distinguish calls to each number by distinctive ringing patterns. The standard ringing pattern applies to the billing telephone number, while the dependent telephone number receives a distinctive ringing pattern for incoming calls. Distinctive Ring is available to single line residential customers where facilities are available.

When a Distinctive Ring Customer also subscribes to Call Waiting, incoming calls to the billing telephone number will activate the standard Call Waiting tone. Calls to dependent telephone number will activate a distinctive Call Waiting tone. When a Distinctive Ring Customer subscribes to any Call Forwarding service, the dependent telephone number may be forwarded to the same number as the billing telephone number or receive no forwarding treatment.

3.4 DIRECTORY LISTINGS - (Continued)

3.4.4 Non-Published Directory Listings - Non-published telephone numbers are not listed in either the Company's directories or directory assistance records available to the general public. When a call is placed from a telephone number associated with a non-published listing, the number and name may be disclosed if the called party has equipment to display Calling Number Delivery and/or Calling Name Delivery. Customers may prevent the display of the calling number and name by activating Caller ID blocking.

3.4.5 Non-Listed Directory Listings - Non-listed numbers are not listed in the Company's directories but are included in directory assistance records available to the general public.

3.4.6 Regulations - Incoming calls will be completed by the Company only when the calling party places the call by dialing the telephone number. The Company will adhere to this practice notwithstanding any claim of emergency the calling party may present. The acceptance by the Company of the Customer's request to refrain from publishing his/her telephone number in the directory does not create any relationship or obligation, direct or indirect, to any other person than the Customer.

The Company's liability, if any, for its gross negligence or willful misconduct or the right of the Customer to seek any legal remedy available for the same is not limited by this tariff. In the absence of gross negligence or willful misconduct with respect to any claim or suit brought by, or other legal remedies available to, the Customer for damages associated with publishing the telephone number of non published service in the directory or disclosing said number to any person, the Company's liability, if any, shall not exceed the monthly charges which the Customer may have made for such unpublished service for the period during which the service was affected. Except as otherwise indicated, the Customer indemnifies and saves the Company harmless against any and all claims for damages caused or claims to have been caused, directly or indirectly, by the publication/non-publication of the non published listed number or the disclosing/non-disclosing of said number to any person.

7.1.2 Customer Requirements

- a. Temporary Construction - The Customer shall be charged the estimated cost of construction and removal of the plant which would not be of value to the Company, less the estimated net recovery value of the material used. The Company may require the Customer to pay the cost of construction plus the cost of removal, less salvage, for temporary construction performed in advance of permanent construction or to provide temporary service.
- b. The Company shall retain title (if applicable) to all plant constructed, as specified within this tariff, provided wholly or partially at a Customer's expense.
- c. When attachments are made to poles of other companies, instead of providing construction for which the Customer would be charged under the provisions of this section, the Customer shall pay the other company's cost for such attachments.
- d. The Customer is required to pay the construction charges made by another telephone company providing facilities to connect with the facilities of the Company.

- b. The Company will determine the type of cable plant extension required on the basis of current and projected conditions and estimate the cost accordingly.
- c. The construction charge for line extensions is apportioned equally among all Customers of a group.
- d. A cash deposit may also be required as specified in Rules and Regulations, Section 2.3.5., on Deposits.
- e. Payments for line construction are not refundable, and no credit will be allowed for future installations on line extensions constructed under the above regulations.

Poles requested by the Customer, in excess of those deemed necessary by the Company, will be charged to the Customer at the installed cost.

7.2.4 Provisions of Private Rights-of-Way

The Company's obligation to provide service through line extension depends entirely on its ability to secure, retain and maintain suitable rights-of-ways without incurring unreasonable expense. When conditions require, Customers shall provide, without expense to the Company, private rights-of-way as needed. Any and all private rights-of-way permit requirements and any and all associated costs will be the responsibility of the Customer and must be furnished before a plant extension project begins.

- b. If additional entrance or distribution facilities are required, or if conditions require special equipment, maintenance or methods of construction, if the installation is for a temporary purpose, or if for any other reason, the construction costs are excessive as compared with the revenue to be derived from the project, the Customer may be required to pay for costs over and above the costs applicable for a normal installation.
- c. The Customer will provide the Company upon request and without charge written permission for the placement of Company facilities (or the facilities of a Company-designated service provider) on their property.

The construction charges, allowances and provisions previously specified in this Section contemplate the extension of facilities into areas of normal growth and development. Where facilities are to be extended into new areas of residential or commercial real estate development which, in the Company's opinion, are of a promotional or speculative nature, the Company may require an advance deposit equal to all or a portion of the costs of such construction, depending on the circumstances in each case. This advance deposit will be payable prior to the start of construction.

- a. The Company and the developer may enter into a contractual agreement that provides for the periodic refund of portions of the deposit as Customers in the development receive telephone service, and other terms of the contract are met. The contract will specify the estimated number of telephone customers expected to receive service within the area and the time required to complete the project (not to exceed five years). The contract will provide that the construction charge be recomputed to reflect regular tariff allowances, design changes made by the developer, damage to telephone facilities by persons other than Company employees or agents or unusual construction requirements. Periodic refunds to the developer will be adjusted accordingly.
- b. The Customer for telephone service to a development is required to provide the Company, at his own expense, the necessary easements for installation and maintenance of telephone facilities, clear the ground where facilities are to be installed according to Company specifications and request installation of telephone facilities at an appropriate time during construction of the project to avoid unnecessary costs to the Company.
